

Auto Adjust Dual Wattage Smart Converter™

Dual wattage converter automatically senses and selects high (1650 watt) or low (50 watt) setting depending on appliance used. Converts 220V foreign electricity to 110V for use on low wattage electronic appliances -- such as electric shavers, radios, or calculators (under 50 watts) -- or such high wattage appliances as hair dryers, travel irons, etc. (under 1650 watts). Solid state circuitry with High/Low wattage indicator lights. Circuit breaker with reset button corrects accidental overload. Convenient travel pouch.
