

Weatherproof Range

Wiring Accessories

The Weatherproof Range offers a variety of products designed to provide the protection needed when using power outdoors.

The Switches, Sockets and Connection Units have been tested to IP55 (dust and splash protected) and power controllers and enclosures have been tested to IP66 (dust tight and hose proof).

The smooth aesthetics and tough build quality make the range ideal for domestic and commercial usage.

Applications include permanent installation for controlling exterior lighting and power to outdoor equipment such as ponds.

Other uses include power for portable electrically operated devices such as lawnmowers and power tools.
